

Mossel Bay (Kanaberg) Maintenance to UHF repeater - July 2022

The week before last Jimmy ZS1RB was up at the repeater site with the help of a friend (He has a 4 x 4).

He added an extra solar panel and charge controller.

In the last ten days the voltage has remained constant, not dropping below 13.7 volt. (even with ZS1TBP keeping the 145.600 busy.)

Jimmy also put in a remote control system wired to all equipment to be able to switch them on or off.

Currently Jimmy, Rassie and Trevor has access to switch the UHF repeater on and off.

It shows OFF at present because of the permanent transmission from Riversdale.

Jimmy at work on site.
